## Wet paludiland

### Christmas lyrics by John Couwenberg

Peatlands drained, used for cropping  
Ditches deep, will need blocking  
Rewetting the site, we're happy tonight  
Walking in a wet paludiland

Let's reduce gas emissions  
Novel crops, new ambitions  
Let's make the land whole, and substitute coal  
Walking in a wet paludiland

Growing cattail for new insulation  
Light a fire with new reed briquettes  
P'ludiculture is the new sensation  
Offering Solutions, meeting threats

Peatlands should be rewetted  
Drainage not be abetted  
Some laws must be changed, some things rearranged  
Calling for a wet paludiland

Growing cattail for new insulation  
Alternatives will help avoid regrets  
The answer is in planned palud'fication  
We should not sit and wait but get ahead

Hear us shout, you must listen  
Once the water has risen  
All will be good, have you understood  
Calling for a wet paludiland
